SLIDE 1

Reading the monsoon in a campus rainfall series

Kavya Suresh · B.Sc. Physics project · Fictional Government College, Kozhikode

SLIDE 2 — QUESTION

Can a simple, documented rule flag unlikely jumps in a three-year daily rainfall series without inventing missing values?

SLIDE 3 — METHOD

- Order the days; mark gaps; do not fill them.
- Flag a jump above an agreed threshold.
- Write every exception in a lab note.

SLIDE 4 — SAMPLE FINDING

Three days in the sample summer were flagged. Two were later traced to a known sensor outage. One remains unexplained and is kept as a flag, not a correction.

SLIDE 5 — LIMITS

This is a student project on one site. It is not a climate study and not a forecast.

SLIDE 6 — CLOSE

Document the cleaning. Do not hide the gaps. Thank you.
